## Financial Support: General Definition of slightly larger companies

According to the European Commission

To count as a slightly larger company than an SME, your organisation must be engaged in an economic activity and must have:

- fewer than 500 employees and
- an annual turnover of no more than €100 million

Whether you count as a slightly larger company than an SME may depend on how you count your workforce and turnover. Please note that you must take account of any relationships you have with other enterprises. Depending on the category in which your enterprise fits, you may then need to add some, or all of the data.

Please note that the information given in this presentation may be subject to changes.
